## **The 19th International Conference on Electronic Business**

Newcastle Upon Tyne, United Kingdom, 8-12 December 2019

[www.iceb2019.org](http://www.iceb2019.org) / **Submission Deadline: 30 September 2019**

### **CALL FOR PAPERS**

The *International Conference on Electronic Business* is an affiliated conference of Association of Information Systems. It brings together leading Electronic Business scholars in Asia and around the world. The conference is held under the supervision of The *International Consortium for Electronic Business* (ICEB) editorial board and is the top academic Electronic Business conference in the world. It brings together top researchers in Electronic Business field and related areas within Asia and around the world to present cutting-edge research and exchange intellectual ideas.

The 19<sup>th</sup> International Conference on Electronic Business will be hosted by the Department of Computer and Information Sciences at Northumbria University in Newcastle Upon Tyne, United Kingdom, and co-sponsored by The International Consortium for Electronic Business and International Journal of Electronic Business.

The Conference will be held in Newcastle Upon Tyne, United Kingdom on December 8-12, 2019. The theme of this year's conference is Artificial Intelligence Empowered Business Processes. Information and communication technology (ICT) has profound impact on re-designing our environment with all the new technologies, by transforming the connections among people, organizations, governments and communities. With the IoT as the infrastructure and recent breakthroughs in AI algorithms. We are shifting toward the smart city age with many major business processes are empowered, changed, or replaced by AI technology. Governments and organizations around the world are seeking new ways to improve efficiency of services and quality of life. Artificial Intelligence Empowered Business Processes under smart city environment as a vision responds to such a request. In this conference, we hope to bring international scholars to explore the meaning, applications, practices, and issues related to Artificial Intelligence Empowered Business Processes.
